

Regional Tourism Organizations / Ministry Meeting:

The Economic Impact of Tourism in Ontario and its Tourism Regions

Ministry of Tourism, Culture and Sport November 12, 2013

Purpose

- To provide an overview of tourism's economic impact in Ontario and its tourism regions.
- Identify research resources available to Ministry partners.

Tourism Research Unit 2 We know. Just ask.

Tourism Research/Data

How can the tourism industry use this kind of information?

- To measure the relative economic importance of an industry or the returns to an investment in terms of jobs, taxes and GDP
- To inform business planning
- To study the industrial connections of tourism and determine potential partnerships
- To study ways of retaining more of the benefits of tourism spending

Data sources and Ministry Tools

- Multiple data sources:*
 - Input-Output tables for Ontario
 - The Tourism Regional Economic Impact model (TREIM)
 - The Travel Survey of Residents of Canada**
 - The International Travel survey
 - Labour Force Survey for characteristics of labour force
 - The Travel Arrangements Survey
 - The Business Registry
- Data as well as an economic impact model (TREIM) are available on the Ministry web site: http://www.mtc.gov.on.ca/en/tourism/research.shtml

^{*}Data sources, all from Statistics Canada with the exception of TREIM.

^{**}TSRC was redesigned in 2011

How Important is Tourism to the Ontario Economy?

In 2010, Ontario's tourism receipts reached \$22 billion*, or 3.6% of Ontario's GDP

Table 3: Components of Tourism Receipts & Visitor	Spending	- \$Millio	ns	
	2000	share	2010	share
1. Ontarians' spending in Ontario while visiting the province	7,613	37.6%	9,808	44.5%
2. Other Canadians' spending in Ontario while visiting the province	1,346	6.7%	1,677	7.6%
3. US visitors' spending in Ontario (including fares to Canadian carriers to get to Canada)	4,981	24.6%	3,065	13.9%
4. Overseas visitors' spending in Ontario (including fares to Canadian carriers to get to Canada)	2,508	12.4%	2,546	11.5%
Total visitor spending in Ontario	\$16,449	81.3%	\$17,095	77.6%
7. Ontarians' spending in Ontario on transport-related items for trips outside the province and with no visit in Ontario	2,679	13.2%	3,754	17.0%
8. Ontarians' spending in Ontario on travel agents' fees and commissions for trips outside the province	1,068	5.3%	1,140	5.2%
9. Other Canadian's spending in Ontario, but with no visit in the province	39	0.2%	53	0.2%
Total tourism receipts in Ontario	\$20,234	100.0%	\$22,042	100%

Source: Statistics Canada: TSRC, ITS & Travel Arrangements Survey; MTC

st 2010 statistics are being used due to the change in methodology of the TSRC making 2011 data incomparable with previous years

Ontario exports 43% of its travel products to non-Ontario residents.

Tourism accounted for 2.4% of Ontario's total exports and was the province's 9th largest international merchandise export industry.

1.8% of Ontario's exports were accounted for by exports to international travellers and 0.6% to inter-provincial travellers.

Ontario's tourism imports account for 8% of the province's total imports.

Imports associated with tourism consumption grew much faster than imports associated with tourism production, while tourism-related businesses increased their imports by more than other industries.

Imports are economic "leakages" and as such decrease the impact of an activity on GDP.

Table 5: Tourism-related Imports in Ontario (\$Millions)							
		_	%				
	2000	2010	change				
Ontario's total imports of goods & services	\$274,513	\$315,318	14.9%				
From other countries	\$215,663	\$230,304	6.8%				
From other provinces	\$58,850	\$85,014	44.5%				
Ontario's tourism imports	\$17,445	\$25,076	43.7%				
Ontario residents' travel consumption outside the province (incl. foreign fares)	\$11,889	\$18,329	54.2%				
International	\$9,798	\$15,945	62.7%				
Inter-provincial	\$2,091	\$2,384	14.0%				
Business imports required to meet the demand of travellers in Ontario	\$5,556	\$6,747	21.4%				
Direct	\$1,947	\$2,426	24.6%				
Indirect	\$3,609	\$4,321	19.7%

How Important is Tourism to the Ontario Economy? - GDP

In 2010, tourism generated \$19.5 billion of GDP, accounting for 3.2% of Ontario's total GDP.

Of the \$19.5 billion, \$9.8 billion were produced by Ontario's tourism related industries accounting for 1.6% of the provincial GDP.

In real terms, the GDP produced by the tourism industry in 2010 at basic prices exceeded that of Agriculture, forestry, fishing & hunting, and that of Mining and oil and gas extraction.

Table 6: GDP generated in Ontario from tourism receipts \$Millions of nominal dollars at market prices

Year	Total	Direct	Indirect	Induced	Annual Rate of Change (of Total)
2000	18,411	9,906	4,570	3,936	
2001	18,188	9,730	4,494	3,964	-1.2%
2002	19,138	10,219	4,705	4,214	5.2%
2003	17,101	8,918	4,340	3,844	-10.6%

The tourism industry employs a higher than average proportion of females and young people and a lower proportion of immigrants.

It employs almost 40% of Ontario's summer students and a quarter of the province's working youth.

Contrary to popular opinion, the industry has a smaller proportion of self-employed individuals.

How Important is Tourism to the Government?

In 2010, tourism generated \$9.5 billion of taxes for all levels of government, of which \$4.0 billion were provincial tax revenues.

Tourism accounted for 3.8% of total provincial revenues, 1.8% of the total municipal revenues and 5.2% of total federal revenues collected in Ontario.

^{*}At the time of this report only 2009 government revenues were available from Statistics Canada. To obtain the 2010 figures we applied the growth rates from the Provincial government's auditor's report and from Statistics Canada Table 385-0032 to the 2009 figures.

What is the economic impact of different travel markets?

Ontario residents account for the majority of tourism's impacts in the province, followed by Americans.

What is the economic impact of different travel markets?

For every \$1 million in visitor spending, Americans have a higher impact than other visitors.

For every 500 additional tourists to Ontario, tourists from overseas have a higher impact than other visitors.

Table 15: The economic impact of \$1 million of visitor spending, by origin - 2010

Discussion

- Are there any research projects or priorities that would be of benefit to tourism regions and/or stakeholders?
- Are there any opportunities to partner with RTOs on tourism research activities?

Appendix: Definitions

- Domestic tourists: In Canada, a domestic tourist is someone who took an "out-of-town" trip for one or more nights, or a same day out-of-town trip that took him/her at least 40 km one-way from his/her home. The trip may have been taken for any reason except for:
 - travelling to and from work or school (i.e. commuting);
 - moving to a new residence;
 - travelling as a member of the operating crew of buses, aeroplanes, boats, etc;
 - travelling for regular shopping;
 - travelling for a routine visit to the doctor;
 - travelling to a hospital inside an ambulance;
 - travelling for a routine sales or service call;
 - travelling on diplomatic or military orders;
 - routine travel to attend a religious ceremony;
 - travelling to go to a funeral;
 - attending a routine business meeting; and
 - picking up or dropping someone else off.

Definitions (Continued)

- The domestic definition of a tourist is totally subjective, as it is up to the respondent of the survey to define what "out-of-town" means to him/her. For example, someone who lives in Mississauga but works in Toronto may consider the Toronto-Mississauga region as "their town", while someone else who rarely comes to Toronto may consider a trip to it as an out-of-town trip.
- Visitor Spending: The amount of money a visitor to a region spends in that region on things like accommodation, food and beverage, retail, local transport, operations of private vehicle, car rental and public transport.
- Surveys usually capture a traveller's spending on the whole trip and never ask the
 respondent to allocate this spending on the places s/he visited. This is done at a later
 stage by Statistics Canada.
- If a trip started and ended in the same region, say, Ontario, then all of a visitor's trip spending will be allocated to Ontario. But if that trip also included a visit to Quebec, then some of the visitor's trip spending will be allocated to Quebec based on predetermined rules.

Definitions (Continued)

- Tourism receipts: In addition to the visitors' spending, a destination also receives
 other spending from tourists who do not visit it, but this spending is associated with
 travel and is received by industries that form a critical component of the tourism
 sector.
- This is spending by the residents of a destination who take trips outside it and is associated mainly with fares to Canadian public carriers and fees to travel agents and other Internet based reservation systems. For example, someone who lives in Toronto takes a trip to France on Air Canada and pays \$X to a travel agent for commissions on a package that included accommodation, transportation and tickets to the opera. In other words:

Tourism Receipts = Visitor spending

+

Canadian fares paid by Ontarians for trips outside Ontario (and no visit in the province)

+

Canadian fares allocated to Ontario for trips by non-Ontarians going through the province (and without visiting)

+

Travel industry commissions on trips outside the province.
