Framework for Opening The Economy

Stage 1

Initially, consider:

For businesses that were ordered to close or restrict operations, opening select workplaces that can immediately meet or modify operations to meet public health guidance and occupational health and safety requirements (e.g., curbside pick-up or delivery).

Opening some outdoor spaces like parks and allow for a greater number of individuals to attend some events, such as funerals.

Continued protections for vulnerable populations and the continued practice of physical distancing, hand washing and respiratory hygiene, and significant mitigation plans to limit health risks. Hospitals beginning to offer some non-urgent and scheduled surgeries and other health care services.

Stage 2

If the initial loosening of public health measures is successful, consider:

Opening more workplaces, based on risk assessments, which may include some service industries, and additional office and retail workplaces.

Opening more outdoor spaces and allowing some larger public gatherings.

Continued protections for vulnerable populations and the continued practice of physical distancing, hand washing and respiratory hygiene, and significant mitigation plans to limit health risks.

Stage 3

If the loosening of public health measures continues to be successful, consider:

Opening all workplaces responsibly

Further relaxing the restrictions on public gatherings. Large public gatherings such as concerts and sporting events will continue to be restricted for the foreseeable future.

Continued protections for vulnerable populations and the continued practice of physical distancing, hand washing and respiratory hygiene, and significant mitigation plans to limit health risks.

community spread.

Ensures that any potential resurgence in cases can be identified promptly.

- A consistent two-to-four week decrease in the number of new daily COVID-19 cases.
- A decrease in the rate of cases that cannot be traced to a source.
- · A decrease in the number of new COVID-19 cases in hospitals.
- Sufficient acute and critical care capacity, including access to ventilators, to effectively respond to potential surges.
- Ongoing availability of personal protective equipment (PPE) based on provincial directives and guidelines.

- Ongoing testing of suspected COVID-19 cases. especially of vulnerable populations, to detect new outbreaks quickly.
- A shift to new and other ways of testing and contact tracing to promote widespread tracking of cases.

As the province eases public health measures, these criteria will also serve as the framework for ongoing monitoring of progress and identifying when a change in direction is required. For example, the Chief Medical Officer of Health may also advise reapplying certain public health measures to manage the risk of recurring surges, outbreaks or future waves.
